

Patient & Appointment Information

Name _____

Address _____

City _____ Province _____ Postal Code _____

Home Phone _____ Other Phone _____

DOB DD/MM/YY Male Female Weight _____ [lbs / kg]

AHC# _____ WCB#/Accident Date _____ DD/MM/YY

Appt. Date	Time	CDC Site
------------	------	----------

STEP 1
Clinical History

STEP 2
Allergies Latex X-ray Contrast / Dye Other

Medication Anticoagulation ASA Other

STEP 3
Assessment Further assess patient clinically to develop treatment plan

Rehabilitation Arrange post-procedure physical rehabilitation

STEP 4
Repeat Repeat all Instructions No. of Times MD Initials

STEP 5
Peripheral Procedures

Therapy Choice Steroid Botox** Platelet Rich Plasma*(PRP)
All can be supplied by CDC Percutaneous Needle Tenotomy (PNT) Monovisc**/Orthovisc**

Shoulder

Shoulder (not specified) R L

Subacromial Bursa R L

Glenohumeral Joint R L

AC Joint R L

Biceps Tendon (long head) R L

Tendon Calcification R L

Elbow

Elbow Joint R L

Lateral Epicondylitis R L

Medial Epicondylitis R L

Olecranon Bursa R L

Wrist & Hand

Radiocarpal Joint R L

1st CMC Joint R L

Carpal Tunnel R L

DeQuervan's Tenosynovitis R L

Trigger Finger R L

Ganglion Cyst R L

Hip & Pelvis

Hip Joint R L

Greater Trochanteric Bursa R L

Iliopsoas Bursa R L

Ischial Bursa R L

Piriformis Syndrome R L

Symphysis Pubis

Knee

Knee Joint R L

Baker's Cyst R L

Ankle & Foot

Ankle Joint R L

1st MTP Joint R L

Achilles Tendon (PRP*/PNT) R L

Retrocalcaneal Bursa R L

Plantar Fascia R L

Ganglion Cyst R L

Morton's Neuroma R L

Other Joint / Tendon / Bursa

Exam Information

- Continue to take all regular medications as prescribed by your doctor.
- **Please be aware that your doctor may need to prescribe medication changes prior to your procedure if you are on blood thinners. You must inform us of any blood thinner medications you are taking at the time of booking.**
- DO NOT chew gum or drink carbonated beverages on the day of your spine or lower back procedure as this may interfere with image quality due to excess bowel gas.
- If possible, do not take any extra pain medications on the day of your exam. This allows us to better assess your response to our treatment.
- If your doctor has prescribed a medication for us to inject, please call us as we can likely provide it to you directly.
- Gowns are provided for your comfort. If you prefer to wear your own clothing and full undergarments, be advised that your clothing could be accidentally stained by disinfectant.
- Once treatment is complete, a technologist will ask that you remain in the waiting area for 10 minutes and will re-evaluate your pain level.
- Please refrain from any heavy lifting or strenuous activities for at least 24 hours following your treatment, or as prescribed by your doctor.
- Serious complications are extremely rare but can happen. It may be normal to experience some mildly increased pain and discomfort the day after your procedure. However, if you suffer steadily worsening pain, experience fever/chills or any sign of infection, develop new numbness or weakening in your limbs, or lose normal bladder/bowel control contact your doctor immediately. If your doctor is unavailable, proceed directly to the nearest hospital Emergency Department. Failure to do so may result in permanent disability.
- All procedures have the potential to affect your ability to operate a motor vehicle. Canada Diagnostic Centres recommends that you arrange transportation to and from the exam.

Special instructions for your cervical procedure, nerve root block, epidural or radiofrequency neurotomy

You must always be accompanied by an adult throughout your appointment. You must arrange for transportation to and from your appointment. Failure to comply with the instructions above will result in your appointment being rescheduled.
