Exam Preparation

You may also visit prepare.CanadaDiagnostics.ca

ULTRASOUND

ABDOMEN

0-2 years:

Omit the last feeding (4 hours prior to exam).

Nothing to eat or drink after midnight prior to the examination. If necessary, a small glass of clear fluid may be given. It is best to book this exam as early in the morning as possible. No milk/milk products or carbonated beverages.

RENAL AND BLADDER OR PELVIS

No preparation is required, however be prepared to spend time at the clinic as the ultrasound technologist may have to wait until the bladder fills to do the exam. A drink may be given on arrival by the ultrasound technologist.

Full bladder is required. Drink two glasses of water and/or apple juice (500 ml) 1 hour prior to exam. If the bladder is not full, the exam may need to be rescheduled.

COMBINED ABDOMEN & PELVIS

0-2 years:

Drink water and/or apple juice only 4 hours prior to examination. No food, milk or carbonated beverages.

2+ years:

From midnight prior to exam, clear fluids only. No food, milk or carbonated beverages. A full bladder is required. Drink two glasses of water and/or apple juice (500 ml) 1 hour prior to exam.

WALK-IN X-RAY

It is recommended that you dress comfortably. Please avoid clothing that has zippers, snaps, buttons and/or beading near the area to be scanned.

FLUOROSCOPY

VOIDING CYSTOURETHROGRAM AND RETROGRADE URETHROGRAM

No preparation. Your child can eat and drink as usual.

NOTE: Children with a bladder (urinary tract) infection must complete antibiotics before the exam

BARIUM ENEMA

NOTE: You may buy pediatric Fleet Enema and Citro-Mag in drug stores. Follow product instructions.

Single contrast enema for Hirshsprung's disease or chronic constipation:

- · No laxatives, suppositories, or rectal exams for 5 days before the exam.
- · Parent will be told after exam if the child has to come back the next day for a 24-hour post-enema x-ray

Single contrast enema for everything other than above:

No preparation.
